

# Welcome to Berglund Center!

*We're so glad you're here! You're going to have a great time riding our new Ice Bumper Cars.*

*Before you hop in, please review the rules.*

## RULES:

- In order to drive a car, you must be at least 6 years old and 42 inches tall.
- Children 3 to 5 years old or those under 42 inches tall may ride with an adult.
- The maximum weight of all passengers cannot exceed 300 pounds.
- Lastly, all participants must be wearing flat closed-toed shoes.
- Flip-flops, sandals, and heeled shoes are prohibited.

## HOW TO:

- When the attendant gives you the signal, enter the ice and walk down to the farthest car from the door.
- Be sure to keep one hand on the board the entire time. Do not run!
- To enter the ice bumper car, you will sit on the edge of the front of the car and slide back into the seat.
- Use caution to avoid hitting the joystick when sliding in. Sit back and wait for instructions.
- For those riding with a passenger, the adult should board first and then help lift the child in.
- Once you are in, the attendant will instruct you to pull back on both joysticks and move to the center of the bumper car area.
- Stay clear of the "no bump zone" and let the bumper fun begin!
- Each car features two joysticks to the left and to the right of the driver seat. This allows drivers to steer the car forward, backward, left, and right.
- To go forward, push both sticks forward at the same time. For backwards, pull them back at the same time.
- Turns are a bit trickier. When the car is in motion, release one handle and then tap again and hold. The car will turn.
- For those that love spinning rides, holding the sticks in opposite directions will put the car and a tilt-a-whirl spin!
- Letting go of the joysticks brings the car to a stop.

## PLEASE NOTE-

- Bumping is encouraged, but be sure to play nice on the ice.
- Riders must avoid any contact in the "no bump zone" at the entry doors, and may not cross the designated coned area.
- If you experience a problem or your car is having an issue, raise your hand. An attendant will come to you.
- Never attempt to get out of your car until instructed to do so.
- Thirty seconds before your ride is ending, your car will begin to beep.
- At that point, start making your way towards the wall where you boarded your car. Listen and follow attendant instructions.
- Again, please remain in your car until instructed to exit.
- To get out of your car, move to the front where you got in, swing your legs out first and push yourself out of the car.
- If you require assistance, let an attendant know.
- Once you are back on your feet, keep one hand on the board rail and walk back towards the door you entered from.

*Thank you for joining us at Berglund Center today!*
